Micro SD Card Slot USB-C Charging Port

Tips: Support micro SD card up to 32G, support file system format FAT32.

How to Charge the Speaker

Connect the other end of charging cable to a charging adapter and connect the charging cable to the USB-C charging port on the Bluetooth speaker.

Note:

During charging, the indicator light is always on in red.

When the speaker is fully charged, the red indicator light goes off.

When using in wet or watery environment, please plug the silicone plug tightly to avoid water in the charging port.

Button Control

1. On/Off

	Press	Turn on	<ul style="list-style-type: none"> The status indicator light is always on in blue. When the battery is low, the status indicator will flash in red. During charging, the indicator is always on in red. When the speaker is fully charged, the red indicator light goes off.
	Press	Turn off	All lights are off and the display goes off.
	Press and hold for 8s	Forced shutdown	All lights are off and the display goes off.

Note: If the Tribit AquaEase Speaker is unable to be powered off due to unknown reasons, you can forcibly turn it off by pressing and holding the power button for 8 seconds and then the speaker will re-start automatically.

2. Bluetooth Connection

	Press and hold the Bluetooth button for 1s	The speaker will automatically enter into Bluetooth pairing mode.	The blue indicator light will flash rapidly.
	Press twice	Micro SD card playback mode	White light is always on

Tribit AquaEase:

- Automatically re-connects to the last paired device.
- Connects 2 bluetooth devices at the same time.
- Memories 8 bluetooth devices.

Note: When 2 devices are connected to the Tribit AquaEase speaker, device A and device B cannot play simultaneously—only one speaker at a time.

3. Multifunctional Button (MFB)

	Press once	Play / Pause
	Press twice	Next track
	Press three times	Previous track
	Press and hold for 1 second	Activate voice assistant
	Press	Answer / end a call

Safety Precautions

- Do not place the speaker in a place where it is easy to fall.
- IPX7 is tested under strictly controlled laboratory conditions. Water resistance may diminish over time under daily use. To prevent damage to the product from liquids, do not immerse the product in water.
- Do not disassemble, repair or modify this product by yourself.
- Keep the speaker away from extreme temperatures.
- Do not use the speaker in an outdoor thunderstorm environment.
- Do not use any corrosive cleaners or other chemical solutions to clean the speaker.

FCC Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
